

## Fund-raising campaign for Zwerg Nase e.V.

Since December 2005 ZWERG NASE is able to provide a wide and optimal balanced service offer for families with handicapped and chronically ill children by three closely interlocked facilities:

In the Short-Term Nursing area children with a wide range of disabilities can be serviced week by week or can find a second home for a larger time period. This feature provides parents which have to take care of their handicapped children day by day with the possibility to have some time for themselves and their other children by knowing that the handicapped child is left in the most capable hands possible.

There are 12 children of different age living in the Rotkehlchen area which have all in common that they are permanently depended on artificial respiration.

The children are not only supported by high quality medical-, nursing- and therapeutically care, but also by the feeling of familial security provided by close reference persons.

The aim of the socio-paediatric centre is the therapeutically treatment of children and adolescents which are handicapped in their developing progress or are at risk developing a disability.

With the backup of the donations ZWERG NASE is able to equip the facility with special toys and furniture for handicapped children.

We, company W. Söhngen GmbH, were so impressed by the dedication and the intense support by the skilful and fond paediatric nurses and the occupational-, the physical- and the speech therapists that it was not possible for us to be deedless. A comprehensive fund-raising campaign was started by the employees and the management to support the ZWERG NASE development association.

It is also our aim for the future to constantly support the work and the dedication of the ZWERG NASE e.V..
